Shaping The Future

Safety. Integrity. Security.

These words are at the heart of everything we do.

This is what our customers demand from us. It is what we've demanded of our people, our products and our services for more than a century. It is the reason Hydratight is the world leader in specialist bolting and machining services.

Today, some of the biggest names in the power generation, oil and gas, industrial and aerospace industries trust us to ensure connections are safe, secure, efficient, environmentally friendly and, above all, leak-free.

We don't just set international standards in joint integrity: Hydratight's products and services, cutting edge equipment and trained technicians, continue to exceed expectations in all aspects of safety.

Hydratight has generations of experience in the field, which means we can oversee the complete joint integrity process, from initial site survey to delivery and beyond. We seek out solutions and strive for best practice, delivering safe, secure, reliable connections, to every customer, every time.

Jan de Koning
Global Business Leader

Together We're Stronger

Innovation. Development. Expansion.

Everyone has to start somewhere. We are proud to say our roots date back to 1901, when the manufacturing business Sweeney was founded.

The seeds of today's business were sown in the 1970s with the creation of two dynamic companies - Hydratight (later to become Hydratight Sweeney) and Hedley Purvis. In 2005, the two businesses were acquired by Actuant Corporation and integrated to form a single new organisation - Hydratight.

Over the years, our name may have changed, but one thing has remained the same: a visionary approach to developing new products and delivering world-class service always and everywhere.

Actuant Corporation

- Created through a spin-off in 2000
- Workforce of more than 7,500 worldwide
- Operations in over 30 countries
- All businesses are market leaders in their field
- Multi-billion dollar company
- Find out more at www.actuant.com

Keeping The World Turning

Trusted. Global. Quality.

Our expertise stretches to all corners of the globe and our international presence is one of our key strengths. From our center of excellence in the UK, to manufacturing locations on three continents and 32 regional locations worldwide, our local presence ensures close contact with the customers we serve.

Walsall, United Kingdom

The Centre of Excellence for collaborative engineering, research and product innovation.

Antigo, Wisconsin, US

Torque, tension and ancillary products for aerospace, government and industrial sectors.

Red Wing, Minnesota, US

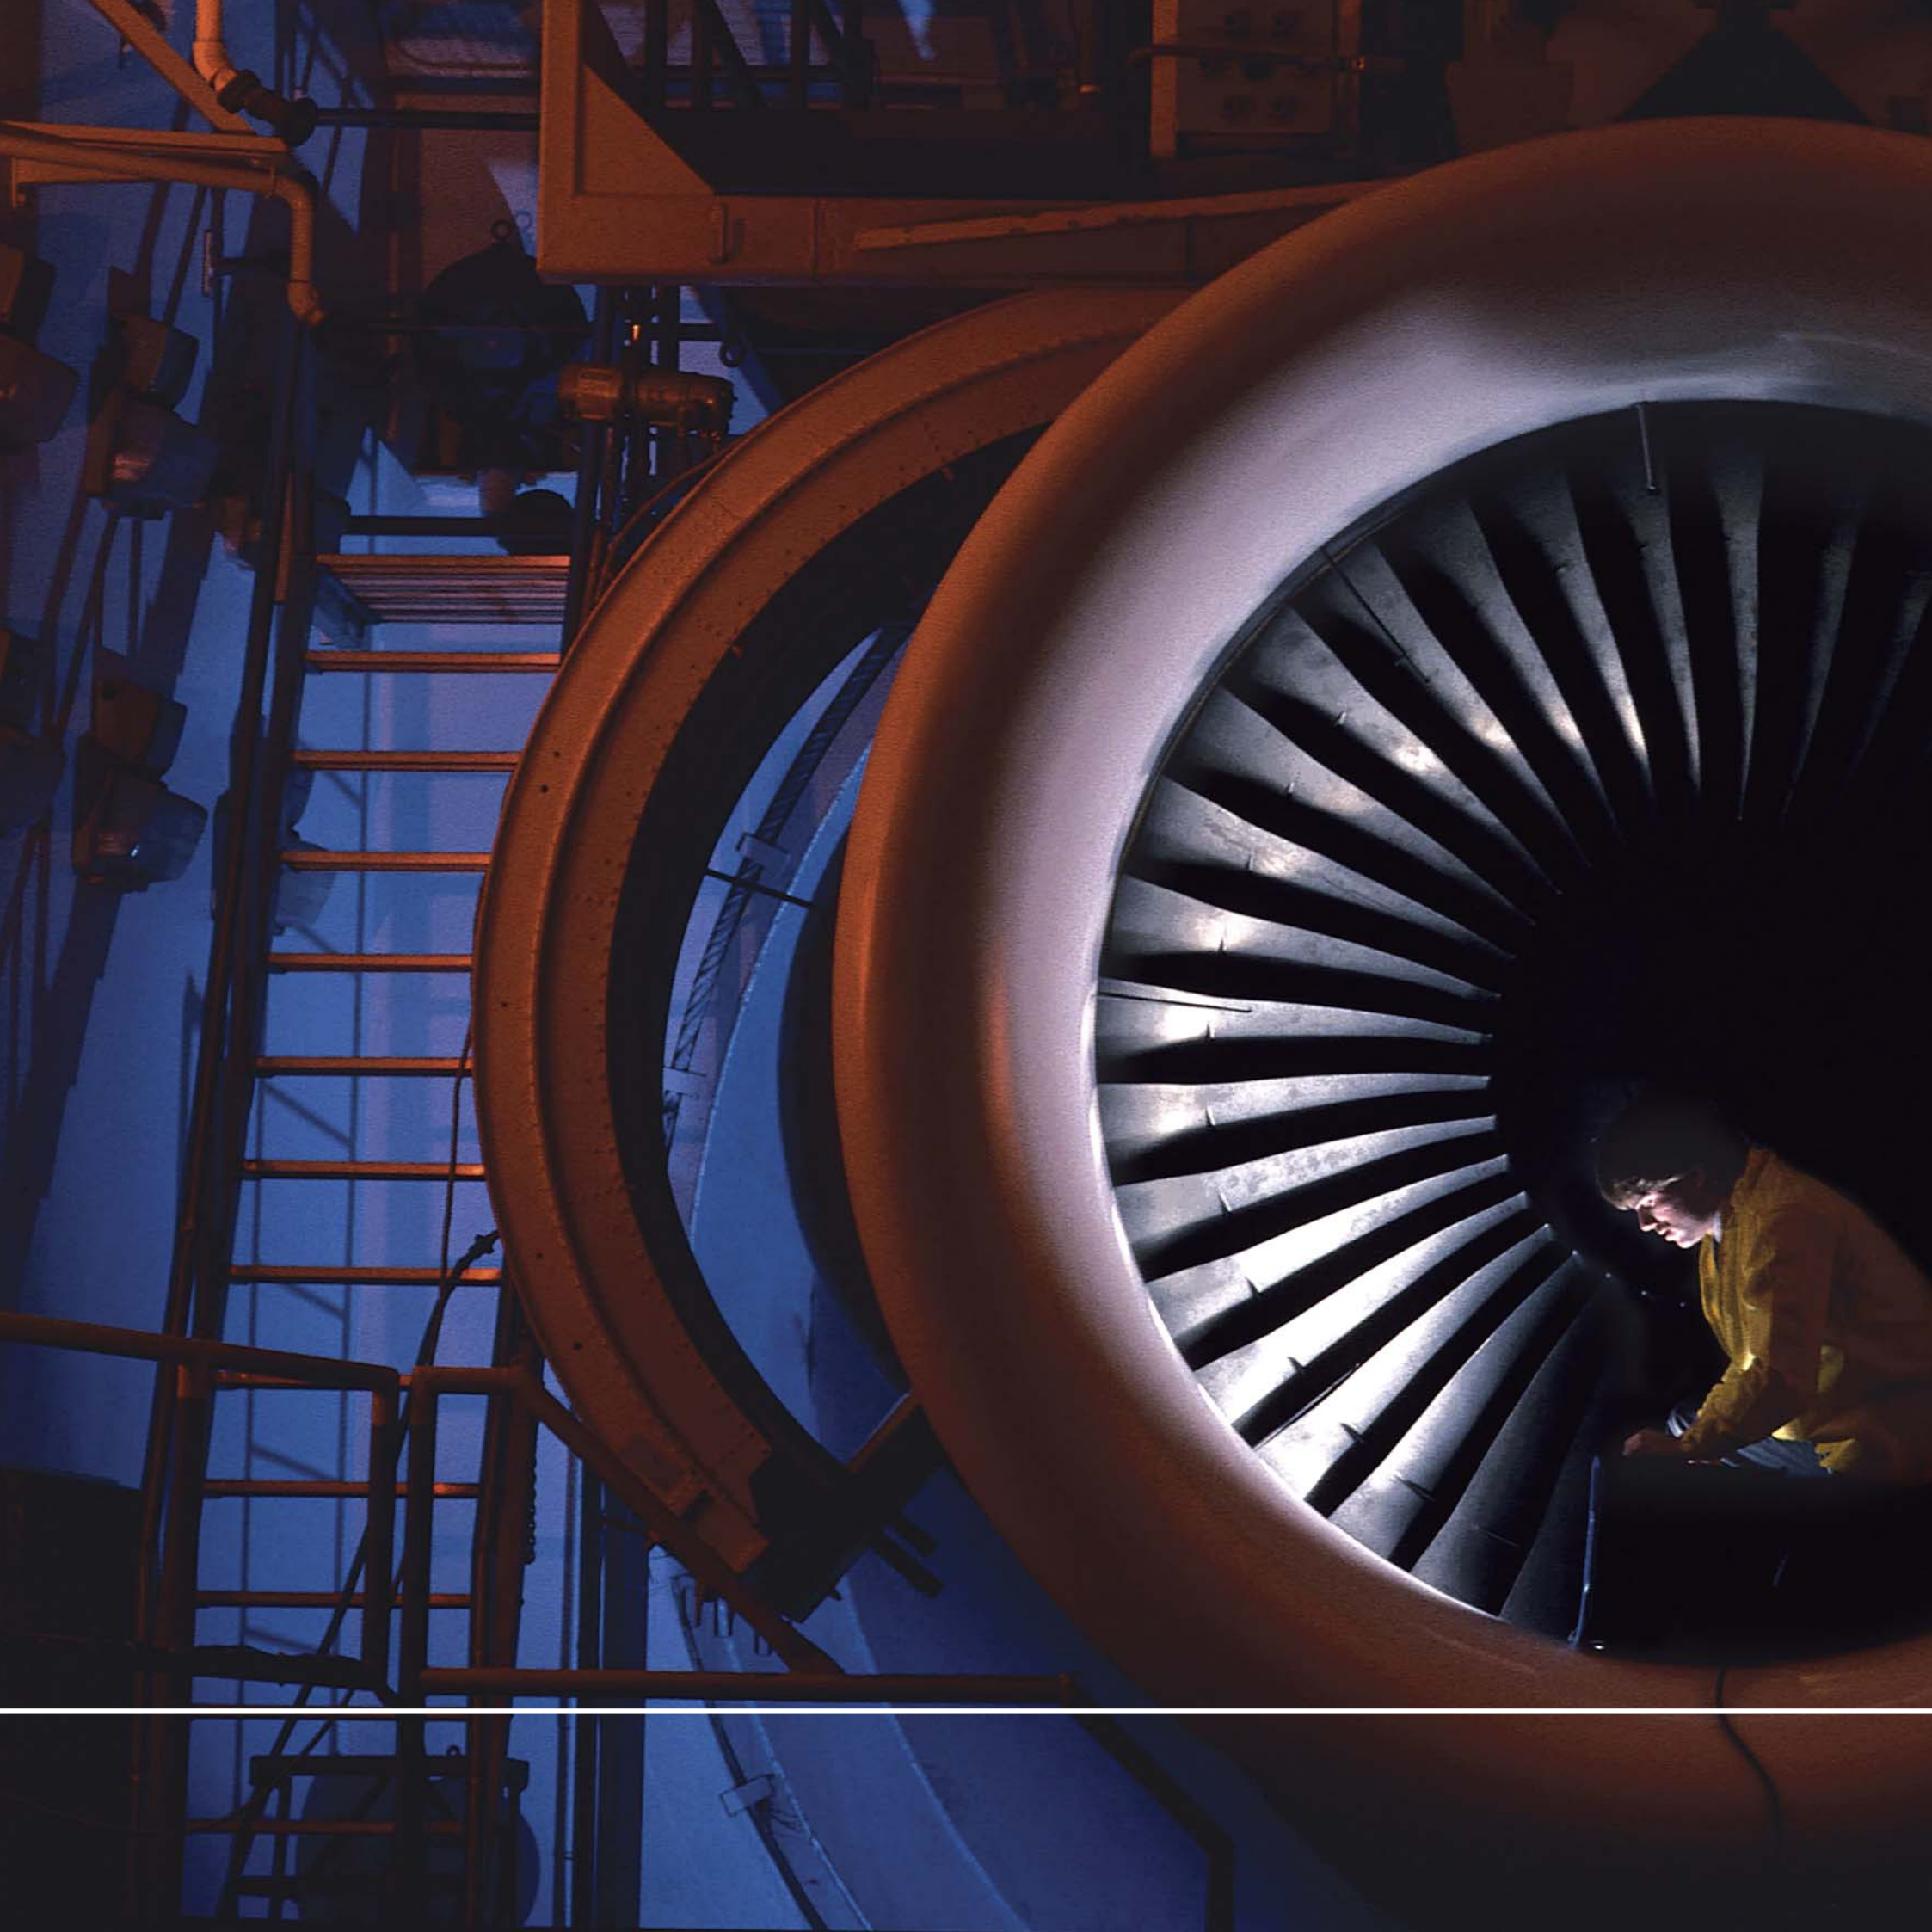

The DL Ricci brand of on-site machining tools.

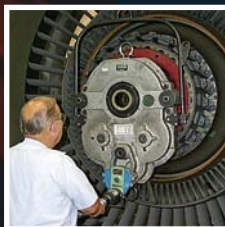

Taicang, China

The full range of Hydratight's topside and subsea bolt tensioner products.

Kerpen, Germany

Leak-sealing equipment for InjectAseal and the DL Ricci brand of on-site machining tools.

You're In Safe Hands

Skilled. Experienced. Expert.

Our products and services are only as good as the people who design, build and install them. By recruiting, supporting, developing and retaining the highest calibre staff, Hydratight brings local knowledge to global operations.

We employ more than 1,000 people, including over 500 highly skilled technicians, who all follow 12 Golden Rules. These rules cover every aspect of Health and Safety in the workplace, ensuring each member of the organisation takes responsibility to protect themselves, colleagues and customers and the community we impact. This ensures a safe, secure and accident-free work environment.

Through our commitment to stringent safety standards, on-site accidents and injuries have been reduced to virtually zero.

Setting The Standards

Reliable. Dependable. Accountable.

When it comes to quality, safety, security and the environment, Hydratight doesn't just meet internationally recognised standards: we exceed them.

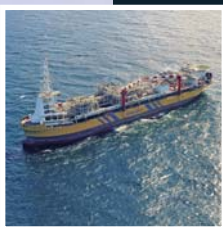

For more than a century, we've been committed to safety, quality, accuracy and durability - and it shows.

All of our custom and standard joint integrity solutions are designed, manufactured and carried out within a quality management system in accordance with ISO 9001:2008 (Quality Management), ISO 14001:2004 (Environmental Management) and OHSAS 18001: 2007 (Occupational Health and Safety). Achievements that we extend across all of our operations worldwide.

INVESTOR IN PEOPLE

Leading The Field

Global. Local. Accessible.

Through improved efficiency, lower costs and safer working conditions, Hydratight consistently meets the demands of a number of diverse markets.

Oil and Gas

Upstream or downstream, offshore or onshore, topside or subsea, Hydratight has the answer. From the construction of an asset to its final decommissioning, our joint integrity solutions play a big part in a growing industry.

Power Generation

Precision engineering and quality components: we leave no room for error. Whether it is nuclear, wind, fossil, solar, hydro or gas turbines, you can trust Hydratight to deliver.

Industrial

Large diesel and gas turbine engines demand precision, durability, and efficiency of the highest level. Qualities only the world's largest manufacturer can provide.

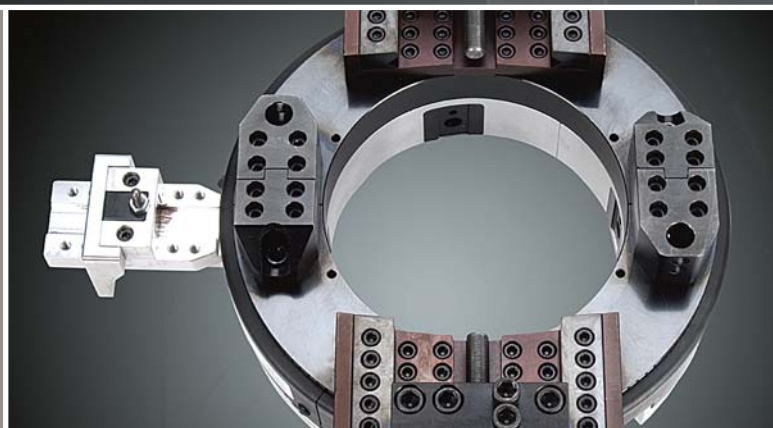

Aerospace

Looking for a world leader? Since 1949, Hydratight's Sweeney brand has designed, developed and manufactured highly specialised tools and handling equipment for the maintenance of aircraft and turbine engines.

Subsea

We were the first to produce split nut technology for subsea tensioners and today Hydratight still continues to innovate. The applications we work on are becoming increasingly complex, but we always find the best solution - our Morgrip pipeline repair system is a prime example.

Supplying Your Demand

Pioneering. Proven. Reliable.

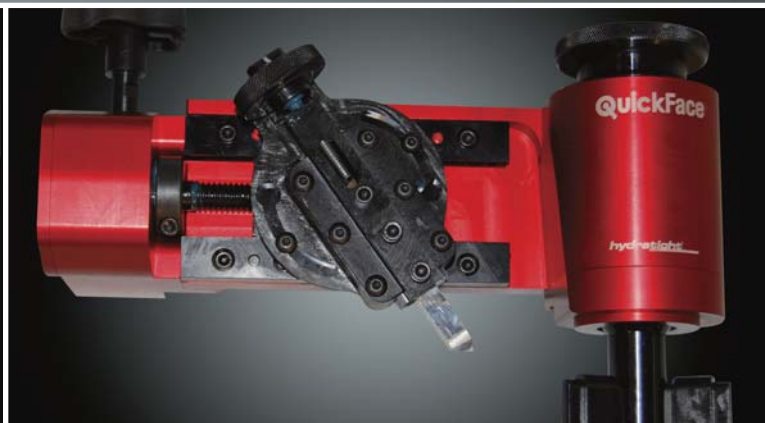

Ever tried repairing a leak 1,000 metres below sea level? Our clients work in some of the harshest conditions imaginable. This means they need products that deliver accuracy, speed and safety in equal measure.

From innovative torque and tension bolting equipment to skilled in-situ machining services, Hydratight brings a diverse range of globally respected brands to the industry's most demanding clients.

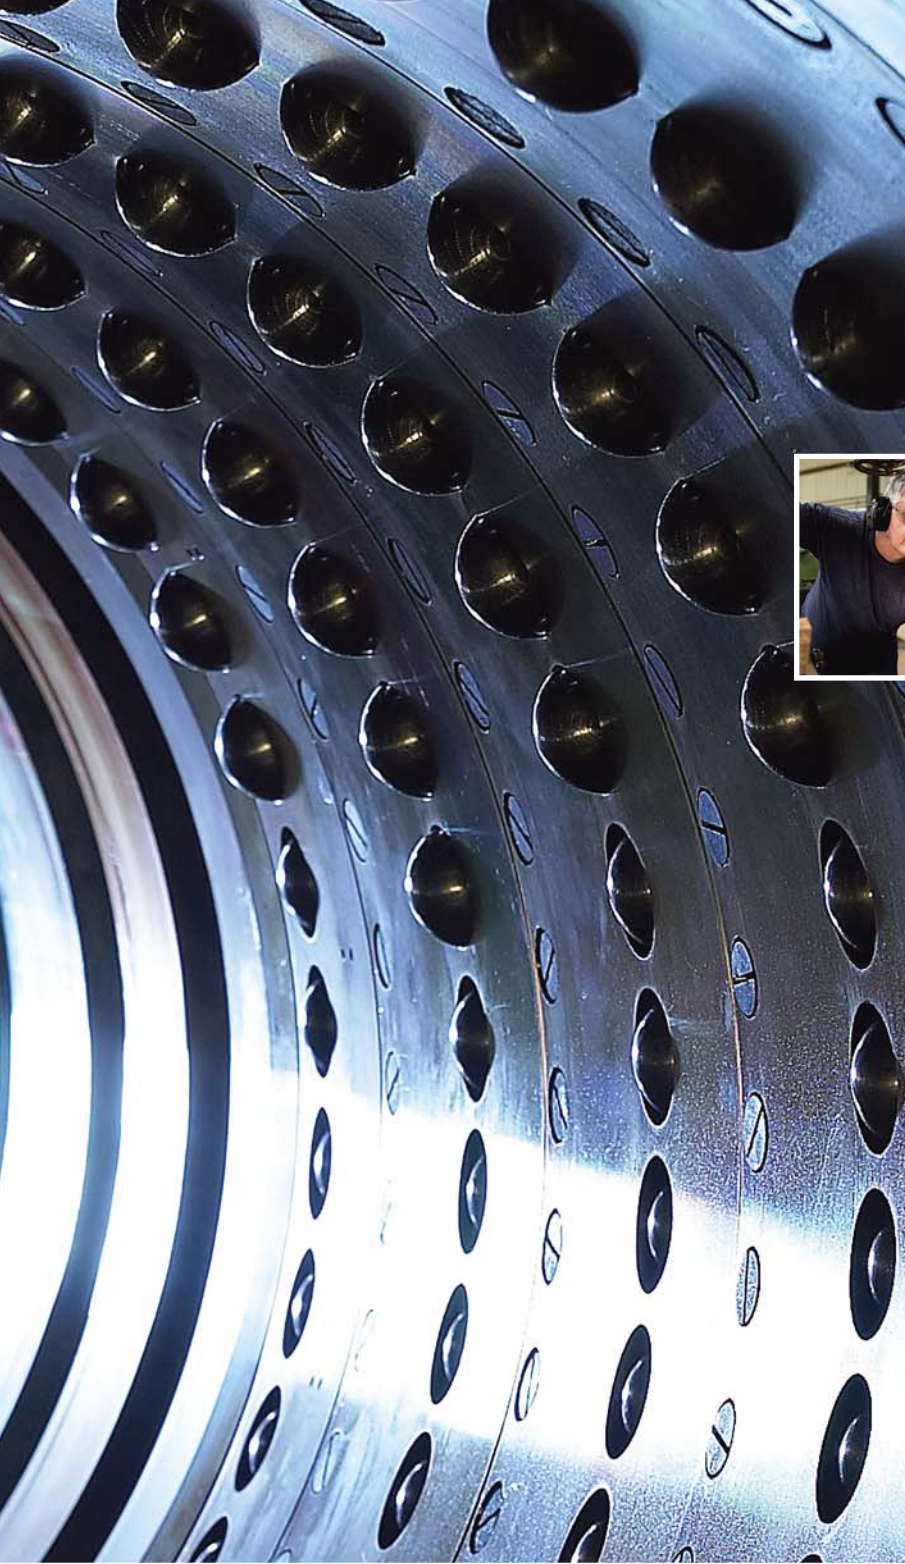

We're as experienced designing and manufacturing hardware for sale or rental, as we are providing pipe cutting, heat-treating or leak-sealing services on-site. We change with the times and move with your business. Show us the need for a product or service and we'll fulfil it.

Our products are marketed under a range of brands including:

- DL Ricci
- Morgrip
- Sweeney
- RSL
- Informate
- InjectAseal
- TensionMAX
- Biach

Moving Any Mountains

Personal. Practical. Pioneering.

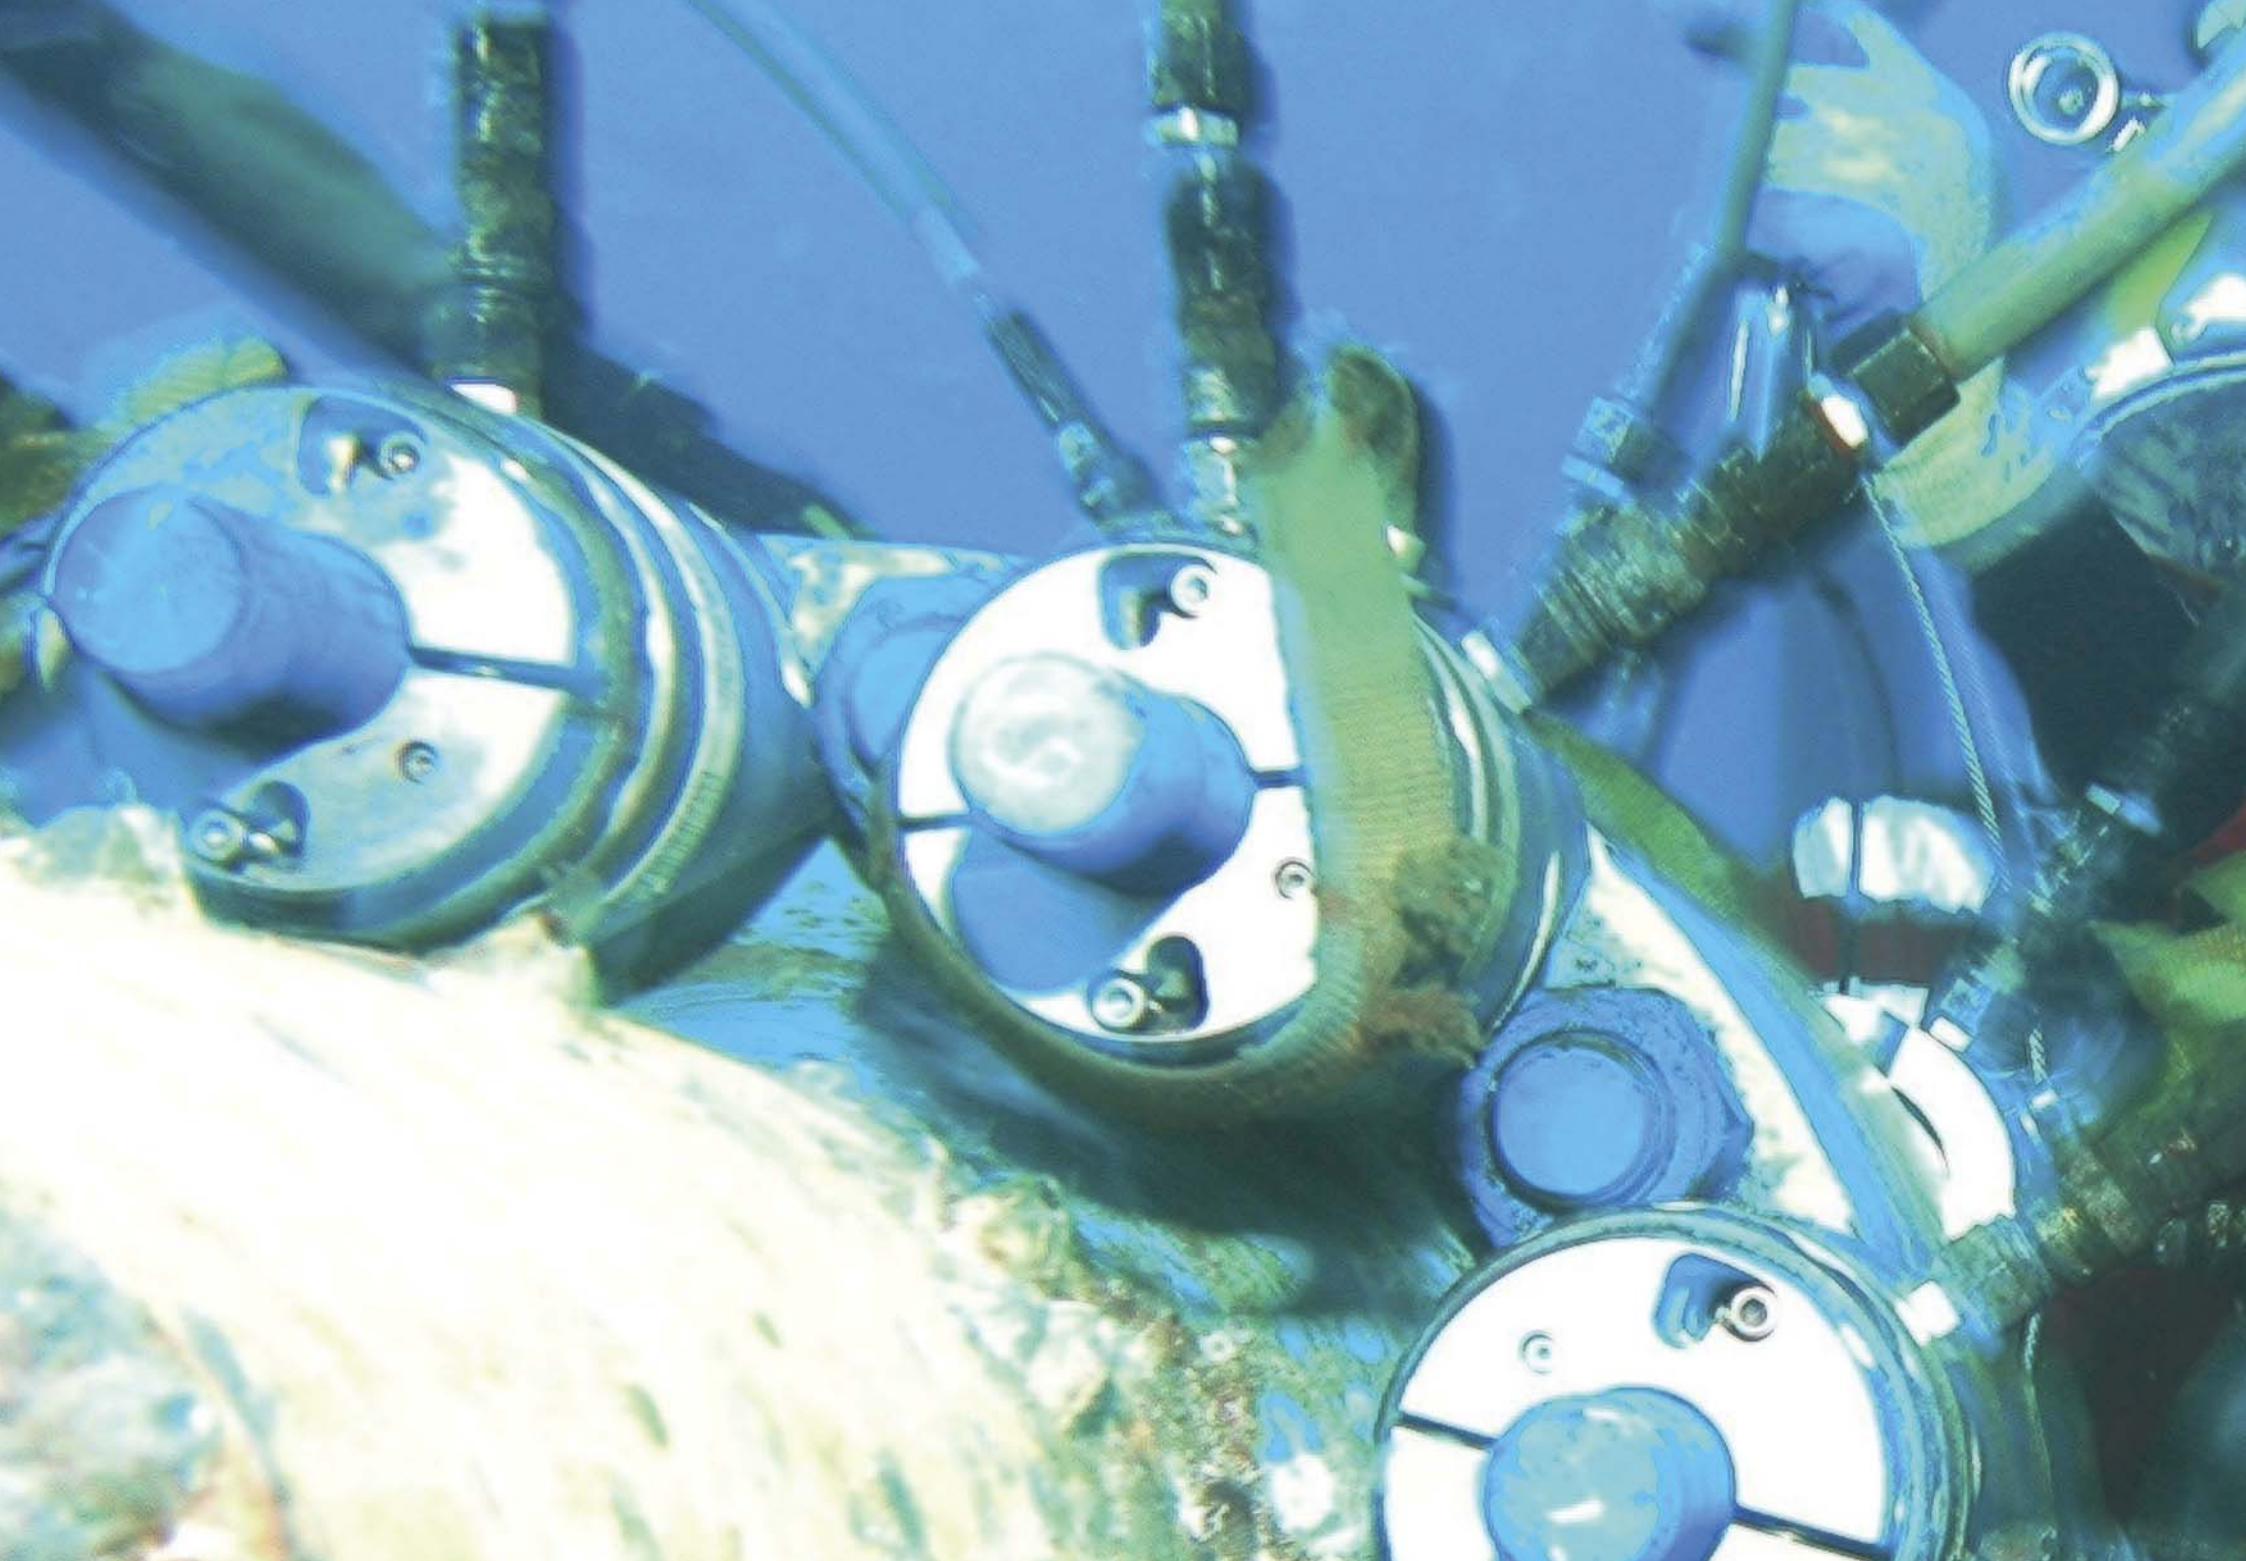

Off the shelf is not always fit for purpose: some problems demand unique solutions. Using the latest software, Hydratight's highly experienced engineers work directly with clients on-site to produce customised modifications, analysis and design for meeting mission critical start-up schedules.

Reliable, feature-rich and user-friendly, our custom machinery designs are tested in the most demanding machining and bolting applications in the world.

We invent pioneering products that challenge even the most basic principles of engineering. In fact, our specialists are responsible for many groundbreaking prototypes: 24 of our products have achieved patents to date.

Our customers can rest assured they will always get the best technicians, most up to date tools and highest levels of service for the job in hand.

Going The Extra Mile

On site. Off site. On demand.

Whenever you need us, we'll be there. Our highly experienced and dedicated workforce offers the widest range of on-site technical support services available anywhere.

Whether you choose to rent or purchase, we offer high quality site-based services to support and maintain the integrity of our products, from manufacture to installation.

Prefer to use your own manpower resources? No problem. You're welcome to tap into Hydratight's knowledge and technical expertise. We believe this flexible approach is the best way to protect our customers' assets. Providing you with tailor-made, cost-effective, efficient services that never let you down.

Knowledge Is Power

Learning. Teaching. Leading.

When we have found the right solution for our clients, we like to pass it on. Every customer is invited to learn through our dedicated, International Training Academy.

To date, more than 4,700 candidates, from graduates to HSE Offshore Inspectors, operators to pipefitters, have attended accredited and custom designed courses at Hydratight training facilities.

Hydratight is the only company to offer City and Guilds accredited subsea bolting and machining courses, now widely accepted as the best in the world. This is all part of our plan to reduce leakages on all assets industry-wide.

Protecting Our Planet

Green. Clean. Committed.

Hydratight understands the importance of tackling environmental issues and we're committed to doing whatever we can to make a difference. With our Global Integrity Agenda, we pledge to:

- Ensure assets and installations have safe, reliable and durable bolted joints – preventing oil leaks, spillages and pollution
- Deliver technologies that make connections environmentally efficient
- Set international standards in joint integrity delivered at local level
- Give advice to customers to design, supply and implement solutions
- Increase asset productivity and safety across the board

Our Brands

Hydratight is associated with many leading product lines around the world. These associations have developed through ownership, technical cooperation or marketing relationships.
